## PROJECTS

### [Tagsen.com](https://tagsen.com)

Tagsen.com is an "online printing service" website. This website is created using Laravel 8. We have used laravel cache and queue to boost the system. We have also used laravel notifications to notify customers and admin users. Razorpay payment gateway is installed to receive payments from the website.

### [Toplocal.in](https://toplocal.in)

Toplocal.in is a website which provides local offers in the categories Food, Health, Fashion, Living and Business to our users. This website is built up using Codeigniter framework

### [Keyzone.in](https://keyzone.in)

Keyzone.in is an ecommerce website which sells "Car key converters". This website is built up using Woocommerce. Initially, we integrated ccevenue payment gateway but later it was changed

### Employee Project Board

"Employee Project Board" is a system where all project of the company is being handled. All team members will be assigned to a project by the "Administrator". Each team member can login into the project board system can see his/her tasks (pending task and new task). Clients can also login into the system and see the progress of his/her project. Further, clients can directly deal with the team member and discuss regarding the issues with the project using a project thread.
